

Product information

- Colour quirl for drilling machines with toothed rim drill chuck, single- and double-barrel drill chucks (quick-action chuck)
- the hexagonal shank prevents the paint mixer from spinning in the drill chuck and the mixer from slipping through
- Due to the ergonomic design of the mixer, shielding paints can be stirred reliably in the shortest possible time in the supplied container to form a homogeneous paint ready for painting
- Fits all HiFreq containers, also the canister of HiFreq-standard-liquid 5 litres

Product sheet - Accessories shielding paints

HiFreq-Quirl
